

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
1. Describe the need for including behavioral health content in Primary Care NP programs.	Demonstrate the importance of educating NP students on performing a risk assessment including lifestyle and risk for suicide, homicide or violence as well as strategies and tools to teach assessment skills in interviewing and diagnosing of mental health disorders.
2. Describe how one online DNP program has addressed this need through curriculum revision, addition of a required course as well as webinars and workshops.	Curriculum revisions including content in core courses, additional course on Assessment and Diagnosis of Psychiatric and Mental Health Disorders as well as webinars and workshops.
