

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learner will be able to identify the essential components of design characteristics in virtual nursing simulation.	The effective design components of virtual simulation identified from literature analysis and focus group interview
The learner will be able to develop a virtual simulation scenario using the provided template for virtual simulation in this study.	The developed design template for virtual nursing simulation
The learner will be able to understand the process of actual simulation operating through the presented virtual simulation.	Presentation of demo-virtual simulation.
