Introduction/Background

- Nursing honors programs (NHP) provide faculty an excellent forum for cultivating the next generation of nurse leaders, researchers, and scholars through high engagement experiences
- NHP face complex and multifaceted challenges
- Silo structures, limited formal collaborative opportunities, and a paucity of literature or formal guidelines leave nursing honors leaders with limited guidance for developing or sustaining quality programs
- Significant and rapid growth of a Nursing Honors Scholar Program across 3 campuses (Denton, Dallas, and Houston, Texas) yielded valuable outcomes, yet threatened the program's sustainability
